 4D arrays? We show you how

British naval forces are pitted against the US marines in an innovative strategy game, ATRAM, which could be set to start a new trend in computermoderaied board games.
ATRAM (Advanced Tactical Reconnaissance and Attack Mission) is a tactical board game in which you, as force commander, must position youf land-based forces and subsequently direet your airborme and naval forces agaiast your opponent's strategic and tactical targets. while simultancously defending yout own.
The role of the computer is to record each manocuvre and act as an impartial referee. The Spectrum replaces the cribbagetype method of scoring which would normally be employed. Miles Bozeat, creator of ATRAM, is a designer and family man. He has a daughter and two sons and he thought up the game with the intention that Continued on pages

## Anyone for graphics?

Compuner users should stay glued to their sets to look out for a competition which will enable them to show off their skill in graphics design.
Compuner Teleservices LId is offering a Commodore 1791 monitor as first prize to the entrant who designs the most original frame to introduce one of their services. It can be for one of the services already available or one planned for the future.
The monitor is worth over $£ 200$ and gives much higher resolution than a normal TV screen. There is also a second prize of 525 , as well as 5 S for anyone whose frame design is used to introduce a service.
You can also participate in a Chrisimas eard competition: the winning entry will be used as the official Compunet Christmas card and will win 125. Other entries which catch the judges ${ }^{+}$attention will be

## NEWS

## teisure software

Mirrorsoft is moving into the home/leisure area with its new Home Discovery Series. Five new products are released for BBC, Electron, Commodore 64 and Spectrum.

The Joffe Plan is a no-diet system which should help you control your weight. Prof Justin Joffe has written a booklet which accompanies the puckage.

Know your own Personality is adapted from the book by Prof Eysenck and Dr Glenn Wilson, Are you extroverted or introverted? How emotionally stable are you? Are you tough or tenderminded? These are all areas covered by the 200 questions.

Know your own Psi q q assesses your psychic ability with a series of tests and games. Master Mind and Quizmaster follow the format of the BBC Mastermind TV series, while Star Seeker and Solar Systern will teach you about astronomy.
Prices are $£ 9.95$ for cassetic and $£ 12.95$ for disc.

Mirrorsoft, Holborn Circus, London ECIP IDQ

## Lower prices

J Morrison (Micros) has announced that all its games will now cost £3.95, white utilities will retail at $£ 7.95$, with the exception of Zip ( $\mathbf{3} .95$ ).

New titles include Lasergates, Skyjoust and Starfighter for the Dragon: Jellybones and Nightflight for the Commodore, and The Old House, Knight Errant, Haunted House and Scramble for the Sharp. Commodore utilities include Edasm. BasicPlus, Spritemaster and Zip.

J Morrison (Micros), 4 Rein Gdins, Tingley, W Yorks WF3 IJR

## Spectrum launch

Activision has launched eight cassettes on the Spectrum. They are Beamrider, Enduro, HERO, Pitfall II, River Raid, Space Shuttle, Zenji and The Designer's Pencil.

Each will cost $£ 7.99$, with the exception of Pitfall II (E8.99) and The Designer's Pencil ( $£ 9.99$ ).
"Spectrum owners will be pleasantly surprised at the sophistication and long-term entertainment valus to be had from our first Sinclair titles," said Geroff Heath. Activision's

UK managing director.
The Designer's Peacil is a programmable pencil which operates by joystick, and virtually eliminates computer control and complex programming design.

Activision, clo Ray Hodges Assocs, $5 / 7$ Forlease Rd, Maidenhead, Berks SL6 IRP

## Polish up your English

Polish up your English with Micro English: 'O' level English Language on your computer.

New from Ludinski Comput-er-assisted Learning, Micro English could help you revise or study on your own, and consists of 24 casy to use programs on disc or cassette for BBC/ Electron.
At $£ 24.50$, the pack consists of two discs, or program, plus audio cassette. The audio cassette is intended to help you communicate verbally and in written form with your tutor, the computor.
More than 580 questions are featured and can be answered as multiple choice or normal questions.
LCL, 26 Avondale Ave, Staines, Middx

## Speed and skill

A staggering total of 8.192 screen locations is claimed by Taskset for its new release. Cadcam Warrior. Scheduled for launch in mid November, the game will cost $£ 9.95$ on cassette and f 12.95 on disc.

Pre-launch promises include "intricate detail... long lasting interest.... extremely high quality:" What you have to do is find your way to Cadcam Control and your rate of progress depends not only on your ability to destroy your opponents and clear all obstacles, but also your speed. Each game is claimed to be slightly different from any other.
Tasksef, 13 High St, Bridingfon YOI 6 4PR

## We have lift0 718

First prize in a nationwide competition for schools is a five-day trip to the United States for a team of three students and their teacher. Highlight of the trip will be the chance to witness a scheduled shuttle launch from the J.F. Kennedy space centre in Florida, Miami. Also on the agenda is a visit to the EPCOT
city of the future in Orlando.
The competition, The CUB British Schools Computer Challenge, is being sponsored by Microvitec. It's aimed at secondary schools and the Rt. Hon. Kenneth Baker MP has expressed his support. "A" challenge for schools of this kind will undoubtedly help build upon the considerable enthusiasm for the use of computers in education which has developed over the last few years", he staid.

Microvitec managing director Tony Martinez said: ''We feel our success, coming only four years after the company's formation, is due in no small measure to our performance in the educational sector of the computer market in which 92 per cent of all schools are equipped with our CUB colour monitors. The competition is our way of acknowledging such suppori:'

Mr Martinez went on to talk of a challenge between British and American schools, possibly in 1986. Upper age limit for the competition is 16 and entry forms will be distributed shortly before the preliminary rounds begin in November.

Microvitec, Futures Way, Boll. ing Rd, Bradford BDS 7TU

## Adventures From books

The Nomad of Time, The Saga of Erik the Viking and The Stainless Steel Rat Saves the World are the titles of three new adventures from Mosaic Publishing.
Adapied from books, the games feature striking inlay cards which look more like book covers than software inlays.

The Saga of Erik the Viking runs on the Spectrum, BBC and Commodore and costs $£ 9.95$ for a boxed pack with booklet and cassette. Based on the book by Terry Jones, of Monty Python fame, it has over 200 locations, each illustrated. The game was written by Level 9 Computing.

The Nomad of Time is based on Michael Moorcock's Oswald Bastable series and runs on the Commodore. Price: 59.95 .

The Stainless Steel Rat was written by Shards Software, as was the Nomads of Time, and runs on the Commodore. Your mission is to travel through time to save the world.

Mosaic Publishing, 187 Upper St, Islington, London NI /RQ

## Graphics

## From from page

used to stock up the Christmas card shop.
Jane Fairbank of Compunen, orte of the judges, said: "The new system is graphically very exciting. We have the whole set of Commodore graphics to use." She added: "The idea came from the Compunet Jungle. That is the area where anyone can upload:" She said that the standard was very high indeed.

Sue Neville of Compunet said: "Compunet is always looking for new designers and any frames used on the system will be paid for:"

Jane Fairbank said that Compunet also plans other competitions for the future but details of these have not yet been finalised. She said: "The systen is terrifically internctive so the idea for a competition Whas fairly obvious"

Closing date for all entries is December 14th. The competition is open to anyone who owns or who has access to the system and is not just for computer buffs. "We're looking for good, original images, some of which may be quite abstract." said one of the judges.

Compunet Teleservices Lid, Mefford Hse, 15/Id Clipssone St, Londor W IP SES

## British

## From front page

it should be played between lunch and tea-time on a Sunday. The game can be saved to tape and the board packed away, so that play can be resumed at a later time.

Mr Bozeat said: ${ }^{*}$ The purest form of design is airplanes. I'm a military aircraft enthusiast I'm not it warmonger but I love going to air shows. The Harrier is the most remarkable aircraft there has ever been. It's so elegant, I wish l'd designed it"

He continued: "] don't feel like a software author. To me, the computer is a tool? Mr Bozeat thought up the game before the home computer had become popular, and originally the scoring was by peg and hole cribbage board. Then, in 1983 the family bought apectrum and realised that there was an alternative to laborious scoring.

Miles Bozeat realiself that his game now had commercial potential and Tony Morris was asked to write the program to accompany the game. ATRAM is professionally packaged and
marketed and Websters has agreed to act as distributors.

Said Mr Bozeat: "When using the computer ats a database advising oplions, computing results and updating status, the machine is at its best, a reliable, very capable and friendly lool assisting imaginative and inventive competitors to pit their wits, plan their strategies and steel their nerve as they try to overwhelm the opposition."

Miles Bozeat alsa believes that with ATRAM the piracy problem has been licked, since the program is useless without the board and pieces.

AMSTRAD ( $\mathbf{E 1 9 . 9 5 \text { ) is being }}$ converted for the Commodore 64 , and will be launched in the United States. American and British forces both have Harriers, and that's the reason why allied countries are battling it out - not that Mr Bozeat knows something that we don't! "It's no accident that the game is a competition between British and Americans", said Mr Bozeat. "There's nothing like a bit of friendly rivalry!"

Websters, Curcon Hise, Middle. fon Est, Guildford, Swrrey GU2 $5 \times W$

## Making music

Commodore is releasing its music package, Music Maker, which will enable you to use your micro as musical instrument.
included in the price E29.95 - is software, a songbook and tutorial material, as well as a 24-key piano style keyboard to fit over your computer keyboard.

Eight built-in voices simulate gutar, piano and synthesiser and different modes can be selected, You can create a range of rhythms, from waltz 10 disco, and play three-note chords.

Single step input means that notes can be inpul using either notes or leiters.

Commodore, 1 Hunters Woy, Weldon, Corby, Norshonts NNI7 IOX

## Fuller revived by Nordic

Nordic Keyboards, the company which look over Fuller Micro Systems after it went into liquidation, has announced the launch of the FDS Executive, a replacement keyboard for the Spectrum. The keyboard will be officially launched at ECC Micromarket at Wembley.

Faller - Ender new manigement

John Gray, joint managing director of Nordic, said: "We believe it's a winner. It's technically sound and reasonably priced at £ 59.95 . Far from being t re-vamped design, the Executive allows the user to plog the Spectrum straight into the keyboard without having to unscrew the Spectrum case:"

Nordic is reported to be spending thousands of pounds in the promotion of the Executive and new packaging and clearer instructions are
essential features.
Mr Gray stressed; "Although we have acquired the Fuller trademark because we didn't want to lose the identity, we would stress that we didn't take on the delivery and service problems which the old company had. We are building stocks of all the products and can deliver in three days!"

Nordic Keyboards, Unif 13, Randals Rd, Knowsley Ind Est. Prescolt, Merseyside

## Duest for the holy grail

Melbourne House's latest release if Sir Lancelot, "a stunning new arcade game for the 16 K Spectrum; ${ }^{*}$ according to pre-release publicity.

You dre Sir Lancelot on the quest for the holy grail. Perils you encounter include birds and dogs, as well as offbeat tigures like Pacman, bouncing balls and a cooking pot with legs.

Once you get to the castle you must collect all the jtems in each of 24 rooms before moving on to reach the treasure.

You have four life restorers to help you. At Es.95, Sir Lancelot will of course run on both 16 K and 48 K Spectrums.

Melbourne House, Castle Yard Hse, Richmond, Surrey

## Wacky games

Micromega has now launched two new releases - Jasper and Jin Genie.

Jasper, at 86.95 for the Spectrum, is a "cartoon-style arcade adventure ${ }^{1 *}$ with 22 screens. Collect objects for use later on. The story depicts Jasper the rat making his way through the jungle - and Micromega assures us it's wacky.

Micromega warms thall clever planning, quick thinking and accurate control are your key to success, rather than sheer reaction speed.

Jinn Genie, for the Commodore 64 at $£ 8.95$, is a four-phase game set in Arabia. You must free the Golden City from Ifreet the Genic. Said Neil Hooper, general manager of Micromega: "Having firmly established ourselves in the Spectrum market, it's our intention now to provide Commodore owners with games of equal quality.
He went on: "We have been looking for the right game for a while, and Jinn Genie is definitely the one, We also hope to produce more for the Commodore in the near future - including some possible conversions of our Spectrum successes."

Micromega, Personal Systems and Software, 230-236 Lavender Hill, London SWII ILE

## Spcice hazeircls

Mastertronic has announced the release of four new games: two are conversions of Commodore 64 games to the Spectrum.
Starace, 这 new game for the Commodore, has you in charge of a space fighter ship battling through four galaxies to find the planet which will be your new home. Aliens, asteroids and fireballs are a few of the hazards in your way.

Challenger, new for the BBC, features you as destroyer of aliens and quads. Be careful that you don't run out of fuel. Space Walk and BNX Racers
have now been converted for the Spectrum, and Mastertronic states that improvements and refinements have been made.

Mastertronic, Park Lorne, $11 /$ Park Rd, London NW8 7JL

## The road to calliee

Shards Software has been looking to the Bible for inspiration for one of its Christmas tittes: Galilee, for the Spectrum. This text adventure with graphics is set in the heart of the countryside around the Sea of Galilee in the first century. Written by the Rev, Peter Goodlad, author of Jericho Road, the game has been thoroughly researched, Price: £5.75.
Also from Shards: Empire, now on the Commodore 64 ( $£ 6.95$ ). The COM empire is your foe, and you must strive to destroy its foress before it conquers the world. You are on the defensive: your enemy is both ruthless and aggressive, but you can save the day if you make full use of cunning and tactics. You begin with an equal number of territories and the fight is played out on a map of the world, with six scrolling continent maps and cight levels of difficulty.
The Pettigrew Chronicles have also been released by Shards for the Commodore and Spectrum, at 59.95 . This is an 'epic four-part adventure, designed to appeal to the whole family,' according to Shards.

Shards, Ste C, Roycraft Hse, 15 Linton Rd, Barking, Essex

## No more clutter:

Compudesk is the name of a new workstation which comes to you ready for assembly. Your keyboard sits on glide
muners and you can slide it away once you've finished using it. There's enough room to store up to 200 dises, while optional doors provide extra security.

The Compudesk stands 1269 mm high, and is 915 by 500 mm . You can choose either teak or sosewood finish. The Compudesk ranges in price from $\quad \$ 58.99$ to $\quad £ 75.99$ depending on additional exuras, but post and package costs are exira.

Jagger, Forge Lane, Canal Rd, Leeds LSI2 2PS

## Service with asmile?

Chalksoft now provides various services as well as educational software. You can swop a Chalksoft cassette in partexchange for a disc, if you return it in its original packaging with a cheque for 5 . 5 .

Chalksoft also guarantees replacement of faulty software free of charge, if returned within 28 days logether with your proof of purchase. After the 28 days have elapsed, Chalksoft will replace your defective program at a coss of is.

Sampler dises are now gvailable for teachers' use; each dise contains partial review copies of 10 or more programs. and costs $\mathbb{E S}$, and Chalksoft has also published its accessories catalogue.

Chalksoff, 37 Willowsiea Rd. Worcester WR3 7QP

## Pint-sized vacuum cleaner

Here's a novel idea: a vacuum cleaner for your computer the Minivac. This miniature cleaner runs on a nine-volt

Jagger's Compudesk workstation

Hand-sleed Mini-vac from 0 \& S Photographic
battery or 240 -volt adaptor and "uses true vacuum cleaner action to remove minute particles and collect them in a cloth bag, unlike compressed air blowers which simply blow the pollutants into the air", according to 0 \& $\$$ Photographic.
Two lens-quality fine brush vacuum heads and a vacuum bag are supplied with the

## Low cost plotter/ printer

Due for November release by Datafax: the Sakata SCP. 800 colour plotter/printer, which is capable of handling A4 paper as well as a 210 mm paper roll. The printer/plolter costs approximately $£ 206$ and is compatible with most home computers - BBC, Spectrum, QL, Electron, Commodore 64, VIC-20 and Oric.
The SCP-800 is supplied together with a manual, and has the facility to supply screen dumps on Spectrum or BBC. Datafax was appointed as a Sakata distributor in September, and this is the first new product to be released since then. Datafax claims that the plotter/printer is of high quality and offers you tremendous versatility for graphics and listings.

Datafax, Dotafax Hse, Bounsy Rd, Basingsoke, Hones RG2I $3 B Z$

## Scramble for your Amstrad

Kuma has amounced the release of its sixth title in its Amstrad range: Star Avengers. The game is a Scramble-type
cleaner, and you can use a separate attachment to convert it to a blower.

Not only is it useful for removing dust on your key. board and monitor screen, it can also come in handy when removing carbon dust and paper created during printing.
$O$ \& Photographic, South Block, The Maltings, Sam bridgeworth, Herts
arcade game which features 10 scenarios. You're in charge on each level. You have the choice of five stages of difficulty, but be warned - they start at difficult and progress to virtually impossible!

Jon Day, Kuma sales manager, said: "We're delighted with this version. It's a challenging high speed game and makes exceilent use of the Amstrad's graphics and sound capabilities. Star Avengers is a sure winner and we are confident that it will rapidly become the number one game on the Amstrad:"
Star Avengers costs $£ 6.95$.
Kuma, 12 Horseshoe Park. Pongbourne RG8 7JW

## Late news

Henry's House, Soldier of Fortune and Witchswitch are three new releases from English Software. All for the Commo dore 64, this trio feature Pavloda Fast-Load. Henry's House has a royal flavour and involves little Henry romping through his new abode. Price: £8.95. Soldier of Fortune is an arcade adventure ( $£ 7.95$ ) while Witchswitch ( 88.95 ) is a race against time to save a village from destruction by molten lava.

## COMPETITION

## - yer 100 copies of Kokotoni Wilf by ElduE

## to be won

## If you own a Spectrum or Commodore 64 then you can enter our free competition. you could win a personalised copy of Elite's best-seller Kokotoni Wilf

This week's competition is based on the best-selling game Kokotoni Wilf by Elite Systems.

Koltotoni will is the first release from Elite Systems and is cutrently doing very well in the software charts. Elite has already planned its

garnes tased upon two popular TV series: The Fall Guy and The Duke of Hiwerd.
Kokotoni wiff is available for the Spectrum 48K and the Commodore 6t so our compectition is opeat to most computer owners. The hero of ibe adventure is Kokotoni Wilr and his mission is to seek the lost Iragments of the legendary Dragon Amblet. The pieces are strewn throughout time and with the help of the grear magician Ulrich, Wilf is able to pass from one time tone 10 another to carry out his quest.
Wils starts his adventure in the dangerous ere of dinosaurs, mistions of years before man walked the earsh. When he has colieced the parts of the amulet which ere to be found in this age. Urich the otd magician opens: glowing portal is time, and Wif passes through to the nex slage of his journey where the Vikings are terrorising the peoples of Europe. There are plenty of perits in the fater time zones too, iveluding such hostile adversuries as alien robols.
An added advantege that wits has over the average hero is thel he ib endowed with a pair of wingx which gives Mim a much betiee chence against the many foes te has whase.

Kokoroni Wirs is a multixereen arcade/gdventure game with more than 60 screens, and wilf can travel though six different time zonen wo there's pienty of variety. All the screents feature hi-resolution backHrounds.
The compelition formal is rather different this week from our usual wordsquare or spon the difference style. The iden of this is to gel you involved in the game which is on 4ifin.

The problem which you have to solve is mathemaitical but don't worry if maths isn't your strong troint - we give you some helpful tips to gurdge your thinking in the nght direction.
So have a go and good tuck.

## The Competition

Kokoroni Wift is standing on a hith and in the disaance he can see a crossroad. At the centre of this crossroad lie in piexe of the Drazon Ansilet which wif must retrieve. There are four roads leading from the hill to the crossroads and will
must decide which is the best one to take so he can reach the fragment of the amulet in the shortest possible time.
Road A: This road is 2.7 km long but it is quite steep so Wilf can only travel at 5.9 kma per thour.
Road B: This road is 2.9 km long but less slecp so wif can Iravel al 6.2 km per hour.
Road C: This rond is 3.7 km long but is casy going and Walf can travel at 8 kmi per hour.
Road D: This is the shoriest coad and is only 1.4 km tong but Wir can only ravel at 3 km per hour as it is over difficult terrain.
You must decide which route Wilr muse take to recover the piece af the amuler is quickly as possible.
For those of you whose brains find mental aritimetic as particulat slrain, remenber: speed divided by distance equals time.

## How to enter

Sludy the probiem catefully ana when you have arrived al a solution mil in the entry couspon and seal it in an envelope. Remember to write of the buck of the envelope which roald you think Kokotoni Wilf should take.
Post your eniry to Kokotoni Wif Compelition, Home Computing Weekly, No. 1, Golden Square, London WIR 3 AB, Entrien cloae ai frass poss on Friday November 16 . 1984.

You may enter as many limes as yout wish, but ench eniry must be on an official coupan - not a topy and sealed in a separaie civelope. Infporiant: please follow carcfulky the suidelines on entering incomplere coupons and entriea without the solution on the bick cannot be considered. Words do not easily spring to mind when trying to describe this game, for 1 have seen none like it before. It's a maze game, but What a maze game! You have to build the maze yourself.

Reading the enclosed leaflet, I got the impression that the idea stems from philosophical approach to life. The ptayer is advised to beware desires, and Illusions. Further, the object ti to make an unbroken path to the Source, learning lessons on the way, otherwise you lose your head, with only four incarations in reserve.

The ganse gtarts with a choice of keypourd of joysticks, and a
bilack mark for not being able to redefine the keyboard. Anothter black murk becatase the "up" Key is showtr at 'Z'; a misprint, it should be '2'.
I have no idea how many variations there are, because I didn't get far, 1 always rin out of time.
Althugh is takes gettios used to, I don't think you play this game yod experience ît. It's worth addimg so your collection If you fike in game that makes you think.

## The Dragonstar Trilogy aBM Epectrum 84.95

Delag 4, The Sheiling. New Rd, Swanmore, Hants SO3 2PE

This is a three part all-texs adventure written with the Quiil. Sel in the quast-medieval Dungeons and Dragons erta, the quest is thete-fold.

First, find the princess held captive by a dragon, and rescue her by defenting him. She guides you to the Like of Fire.

After londing the second part, you find yourself at its mouthern edge with a new quest; to find the Goliden Key of Sever.
That done, $n$ message is revealed which launches you on the Iinal conquest of the Dark One, and the destruction of the

Dragonstar Crystal.
I didn't feel tempted to sit for hours trying to unravel Dragonstar's secrets. Perhapls It's just me, but it doesn't match other adventures I've seen.
Presenting the user with a series of husdles loosely linked by descriptions relies overwhelmingly on his desire to beat the programmer. For me this is nox enought.

The best adventures should surround you in a land of fantasy, draw you with an intriguing plot, challenge you to defeat willy foes, whilst holding your attention by rewarding you with a litele success, and perhaps wit. Very few do

Incentive, 34 London S , Reading RG1 4SQ
-Deep within Vran's Temple you set forth on the Final Mission... can you outwlt the wandering sime, the five gate guardians, or even Yran himselm' I whes reminded of these words, from the cassette inlay, when I was devoured by the slime ufter scoring $36 \%$ of this adventure.

The Final Mission is the last, adventure in the Ket Irilogy, I had not seen the previous ones, so I wat quite keen to zet truck isto this one and sive a good account of myself.
The excellent, initial hi-res screen leads one to belleve that this is going to be a graphic adventure with lots of pretty pictures, but this it not the case. In the $36 \% 1$ saw, in was text only.
One excelleni saspect of this lape, is that it features power lond, to it's not long before you fare playing the game. The usual adventure commands tre present and interpretation of humen input is sood. It's very user friendly in its attempts to undersiand you and it pases some interesting problems.
I must work out how to defen. the slime...

## The Code 48K Spectrum 88.95

## Solt Concern, PO Bon 65,

 Wrwick CV34 4JYInitially one is most impressed by the hi-resolution screen at the bepinning of this adventure tape.
l'tia picture of Bogey (Humpphrey Bogart), complete with that and raincoat, and the is illuminated by a sort of ant nouveau globe lampshade.
The hi-res screten was, for me. the most memorable moment in this text-onity, spy-thriller based, adventure game.
Your objective is to penetrate a KCB strongiold and get into the code room to discover the secret code.
Having discovered the secret, you quickly write to Soft Concern Lid, and if you are the
first with the solution, you collect $£ 2,500$.

The sdventure game itself is a competent rendering, but the lack of a cursor, for human input, I found most amoying. You would expect the high price tag of 28.95 to include a free cursor.

Perhaps the exorbitant price is to cover the cost of having the cassette inlay printed in Russitun and to pay out the prize moncy with.

## The Quest for the Holy Joystick 48K spectrum 84.95

Deltu 4, The Sheiling, New Rd, Swentmore, Hants SO3 2PE
A Quilled sll-text adventure to make you Laughl And it works. Humour comes in many varietien; this in the wry, sly $\ln$ joke kind.
Vhe wery classy re-defined charmeter set, you are trinsported to London, the Holy City. From there, ansiety of buses and conches take you all over the country to different well-known sofiware houses.
There you meet not only the authorl, often described in less than complimentary terms, but chartacterl and situations from their programs. The later prove very difficult to get out of.
Perhapa the most amusing thing sbout this progrem, to $m y$ perverse sense of humour, is the way in which the code transfers, you in one fell swoop from Hampshife to America, or from the south coast to Spain! And why not?
There is one snag with 'in' humour. You hive to be 'in' to appreciate it! As a result, a market fi stsured with the stafi of Melboume House, Automata and Dream, though north of Watford sales could be a tittle thin! If you're a software freak, and know the personalities involved, you'll enjoy this. D.M.

## You could be on our pages

We welcome programs, articles and tips from our readers. If you feel that your work meets our standards, please submit it to us for consideration for publication.

- Programs must always be sent on cassette. Listings are helpfui, but not necessary. Check carefully that they are bug-free. include details of what your program does, how it works, variables you have used and hints on conversion.
- Articles on using home computers should be no longer than 2,000 words. Don't worry about your writing ability - Just try to keep to the style in HCW. Articles most likely to be pubilshed will help our readers make better use of their micros by giving useful ideas, possibly with programming examples. we will convert any sketched Hilustrations into finished artwork.
- Tips are short articles, and brief programming routines, your hints can ald other computer users.
All submisslons will be acknowledged and the copyinght in such works which will pass to Argus speciallst publications Ltd will be paid for at competitive rates.
Keep a copy of your work and inciude an SAE. Label everything clearty and give a daytime and home phone number if you can.
All work for consideration should be sent to:
Paul Liptrot, Mome Computing Weekly,
No. 1 Golden Square, London W1R 3AB

"A quick way of learning - quicker than the printed page".
Mike McCann, Your Computer.
"It took 12 hours to teach a regime that would normally take 40 hours". Peter Marsh, Training Manager, Thomson Holldays

## Wetowertint Tivaran Ey

Siamless, 10 Alstone Rd, Stockport, Cheshure

This is another of several programs I've reviewed that has been writen by R Trueman. Like all the ofhers, the graphos are superb and the game fun to play

In this game smiling jirtle blue creature bounds along the screen. To score points he must eat noles that are found along several floors, He Jeaps up to each floor by jumping beneath large power blocks in the ceilang. When be reaches the top he evits to the next screen

There are monsters to avoid Gising smaller blocks on the ceilings, he may jump over them Further hazards include pipikes that point down from the celings. At intervals these shoot down, then rearact. Should your
creature be under one a life is fos and he begnt the ascent again, but not from screen one
As each screen is completed the current score is shown. This is based on bonuses for the number of screens completed an additzon to the number of notes eaten

## Compnter Mensil aben 52K BEC E12.95

Leisure Genus, 3 Mondagu Row, London WIH IAB

Those who atready know how to glay Kensugton will know what at tartical challenge it is

For those who've never heard of it, Kensurgton is played on a gond of trisngles, squares find heragons and involves placing your own coloured stones to form certan shapes.

A trangle allows you to move one of your oppontents smones, which is very handy when a stone is in in offensive position. A square allows you to move two stones

Your aum is to surround ntiter one of the two bextent of your own stone colour, or one of the three meutral hexigons. The more alert player will be able to work
out that there are seven hexigons overall
Even if you are none the wiser as to how it's played I can tell yout that it's an entiraling game Level orte is usually beatable and is the perfect start for novices, level three is the hardest level and will gave anyonte a rus for ther money

Playang the comptier is fascinating and the game is astoundingly addictive. Leisure Gienus have produced an extremely well presented and taroughly fajoyable game. M.B.

## 

The Edge, 31 Marden Le, Covent FA, Gidn, London WC2
The first theng you notice when loading is thel the program has a rast loading routine in it. This loads the program in less time Анал логта.
Claming more than al ghousand acreens, the action

- takes place inside e computer. Now where have It sten thal before?

You have to coliect master ikey: cards in order to main access to en CPU, which is at the heart of every computer. There are, of course, adversaries, such as flying chaps ${ }^{1} \mathrm{IC}^{\prime}$ s, transistors. fand the like, slop me if you've heard ut before. The action is fast and furious, and energy has to be replenished every now and again I haven't quite figured out the scoring system, maybe that's hecause I have only jusi J sovered a firmg key The press release sheet gives ail the y controk, with foyslick opt on on screen, but there is nu retalatory blas.

In case you are expecting one thousard locatoons I had better add that they are varialons of a maze. with PCB track representing the walks. Better than the average game in this class.

## +nsirvetions playability yraphics

## From Kensington to Ramagora

## Here are a few games for every taste or preference. You can be a hero or a conqueror

## Zorakk the Conquerar 32K BBC E7.95

Icon, 65 H gh St, Gosforth. Tyne \& Wear

The inlay looked very invilung, and the instructions seemed promising, You have to play the part of Zoraxk, and you find the lost Crown of Ulemate Dark ness, which lies th three pieces, one in each of the medieval lands of Ramagora
On loadsng, the game dasplay Is sluggishly drawn. The plam feature on screen is the graphucal representation of the land you are $\mathrm{H}_{1}$, whach is split up inio 30 squares in grid fashion. You move around using the keys N , $S, E$ and $W_{4}$ and there are four butdings which you may vist You may baly wamiofs, or you can enter a bastle
The latter is always welcone
berause you have 20 wan a britle to stand a chave of obtaming t pece of the ctown. Whether you win or not is totally random. progress can on now way be swayed by the player
Hazards such as staryalion. the plague and dragons don'1 Oprove life
Overall it's not remarkable and will probably be favoured by he younger tenteration. The complete randemness often allows a novice to achere a higher score than ant experrenced player.

## IMR.I.E. es天. Hinfl

Achowsion, 15 Harley Hise, Marychone Rd, London NW 1

Roderick Hero is b bit of a send up of some of those heroes in Amerscan comica. It appears that volcatus tectivity has trapped some miners in the mane shafis of Mount Leone. Just what they are mining t5n't made clear, ft probably isn't relevant to the Rame anyway
Like other miner games I have seeth, there are different hazards on different levels Unlike the ather games, you begin each level With six sticks of dynamute, and, of course, the ubiquitaus micro laser beam

Agan ax in other sumtlar games, you have a power/energy guage which diminishes ies you plumb the deplhs

Apparently there are spiders, shalt bals, maner moths and nesting snakes, some of which 1 encountered on my travels.
The sconing la reasonably surarghtforward, with the highest trarks, one thousand, scoted when you restue each maner. Of course you can't progress to 1 lower level if you haven't fescued the miner on your level
it seems there is is spectal message if you score one mallhot, Ye Giods! The graphics are nothang to write home ebout, although the movement smooth

## Sweet Talker

Cheeloh Markefong. 24 Ray St, London ECIR 1 D 1
This if one of the first of the allophonte-based speect symhesteres evalable for the B8C ind as such it has to compete directly with Acorn's own Speech Sysithesis upgrade. As 1 have used both, I will compare one with the other as lar as is necestaty.
Poth systems plug into an ares of the BAC main board left frec for meh upgrades, bul white the Acorth systern needs to be fitted by deater, sinee there are several modificatemic to early boards and several compantms matunted on a small arcuit bourd. Thes plugt difectly thto one of the empty sockers. This 25 such sumple operatson thal almome nyyone could do it without tisik of damage to the compuier

Lstuge of the twa davices is very differen. The Acorn upgeade uses the SOUND statemten, so you might assume It will be the easter system to use In fact thus ist)'t so. The Acorn device to fine if you wont to saty tuny of the 185 words it tis vocabulary, but if you want to butd up yous owa words you have 10 do so by choppang those provided into small puthe and then busting your words to frotn these paris, Using the Chectah Sweet Tather mokes all this effort completely unnecess ary because of the ailophore system.

The theory behund allophones is thun att Englith speech can be broken down into less than ent comparent speech parts, Once you have all these ports in device, and a list to choose from, you should be sble to create nsy word in the English lenguage You musi first decide wiuch southre make ups a word and then put those sound sogether. Thus is done unites wery shot machine code prograsp and th

DATA statement; and the detmonsiration program sapplted shows how maty it fis.

The difference between the two systems is smang. I pever dared to try antd make oew words for the Acorn system but within two punures il was crealing speech from this one, The drawback is the qualisy of speech: Acorn's really does sound htuman whereas Cheerah "s sis very machane-IIke - 50 much so that my son refers to is ts Robot Speech
Here is the erunch: you eat have good qualtry tult very limbed voctbutary or an unlamiled voczaulary wath poorer qualty speech. I wht setsle for the Cheetah everyume We all kraw that it's a machure so why not admut it and use the system to the full
The most disappointitg fealure of the whole system is the manual, which is mothms more than a single shet of At paper. This could be much tmproved with more detailed informalion on the use of the pauses and 4 better Fittigg dhagram. Heving sad that, it is adequate. I tot going in a muater of minutes
D.C.

## cmestrin kay

Chectah Marketmg, 24 Ray St, London ECIR 3DJ
lmagine remote control joystick which is able to petform alt the functions of i mormal joystick, without able comatection to your Spectrum compuser Ifom distance up 10 12 feet from the streen Put all that together and you have the Checlath RAT, In case you are wondering. RAT stonds for Rempere Action Transmitter

RAT works in much the same way as remote TV combroller You point the transmatter hand utalt in the approxamare derection of the plug-tp recemer module iboth supplied) and - souch.
senstive pad on the hand unt sends your commands to the spectrum. A simple one-page set of mstructions emmpletes the packige
t was disappoinied wath the qualty of construction of the greyfblue hand unit. It nequites a PP3 baftery ( nol supplied) and when the battery is incerted and the hatch closed, my hand utit began to sptt alomg its seams The fouch pad is the unit I recenved was beginning to pea! away from the rest of the unit

By contrati, the plugotn module was sturdily built. It sneluded an edge connector on the reverse side of the unit to allow other modules to be addied of tequred

The tousch pad on the hand unt is divaded into two parls. A1 the tront is an orange coloured Fire bution. while clote to the back is a blue clock+face with egght markings, tudteating the enght drections of mavement, This is destgned for mane of use by leff- and righi-handed players. All you need to do (so Chectah clamst is touch the marking on the clock to mend your man th the appropriate drection. I found you had to prest the N,S, W and E markings gute hard io oblan 0 response, and the markings for diagonal movement almost never worked, even when I prested realy hard

Whale it would lake an expervenced joysulth user sotne sime to adjust to this new contral method. RAT offers one big advantage, if you use a large screen TV as motitor, then you can move same distance away frosit the tereen, I tested it it six feat, and it worked as well ty it did tit six mehes. From I2 fret। cotldn't see my screen tho well, but it still setmed Oh'
RAT can be used for any game derighed for use with Kemprion joyshicter thes gives you a wide selection, but, of course, quite few yames won'l work. You can also write vour own programs to usf RAT. Incorporate the

GASIC line LET $=$ IN 31 in your program: a wilb have a value of 0 if no pad 15 touched, or a value up to 16 piependeng on which single pad is pressed Similarty, in machize code, you would use In A, $\mathbf{F}_{1}$

RAT is an interesing and novel ardea. If the touch pards had really been touch-senstive, then the RAT's apeed maght well have been facter than conventional joysick, ats clamed by the mamufacturer. Perhap: full prodbetton versions may offes better sensilivity, nud e hand unth whech does not Tell apart! D.N.

The RAT - Chelah's rempte Esilun Iransmitier

## Chetrla Sweet Talker

## Three in a

## row

## Variety is the spice of life, and there is plenty of variety with these three programs from Paul Sansom and Paut Newsham.

The choice is yours - you can either attack martians, go diving, or just eat eggs and avoid walls

Although you spend mont of your tume eating eggs in the first game, its actual name is The Walls.
If you have ever fancied gotes on a totally eggorientated diet, then this its the game for you, because you walk around the screen cating is many eges as possible.

However, danger is always around in the form of forks and closing walls, which you have to avord. Alt is not lost, however, so don't desparr. There is a way to escape a gory death - by getung a key and going through the exit.

For each egg you eat you will get 10 points, when you retreve the key you will be awarded 50 potnts, and if you actually manage to get through the exit - 100 points is awaung you.

Quick reactions and a keen cye are required for thes game, so good luck and get eating.

If you prefer Martian blastmg to shark shooting, then Martian Attack - another wo-part programme - is right up your galaxy
in this game you are in control of a 'MXSP' fighter plane, and you must fly through the city shooting the alien attack waves one-by-one. As you do so, the occasional tractor beam bara your way, and you must shoot one of the photon zappers at etther end to destroy it
If you faul to destroy the zappers, you will be destroyed by the beam
Thangs 10 watch-out for include aur mines - they imatate sycrons, but if shot they destroy you. Also, if you fly into an arr mine, you will disintegrate.
One point to make about this game is that it only just fits into the unexpanded VIC-20, so do not insert any unrequired spaces

for the machane wall say memory error and you might lose the program.

## AMSTRAD CPC 464 Software by... TIMESLIP SOFTWARE

ROLLABALL............................................. $£ 695$ A challenging game of skill, relying on quick wits and steady nerves. Can you keep the ROLLABALL in motion? All you have to do is slde a piece of track in uts path to divert it, trouble is the 'trackd always disappear when the ROLLABALL moves over them. A very addictive one player game.

The Moors Challenge .................................... 66.95 An ancient game of strategy and cunning. Capture all your opponents counters to win. Play aganst your Amstrad CPC 464 at any of five skill levels, from simple to advanced or play against a friend, you can even tmake the computer play aganst itself.

The Royal Quest $\qquad$ 16.95 Can you discover the object of your quest and then complete it? A classic text only adventure, with dozens of problems to keep you perplexed for weeks. Features melude save game faclity and very large vocabulary.
-... .- SPECIAL INTRODUCTORY OFFER-
For a limited period only* Timeslip Sofiware will be giving away one free title with every two litles purchased, so burry, send cheque/P.O.'s payable to...
TIMESLIP SOFTWARE, Stoneyburn Workshops, The Old Primary School, Mann Street, Stoneyburn, West Lothian, Scotland EH47 8AP
*Offer ends 31st November 1984

## FRATURE

Recently some colleagues and 1 were discussung arrays, and how many dimensions you could actually DIM. We started to put all sorts of shapes and figures on a whteboard in an attempt to represent how the computer actually sces the array. We didn't Find much trouble with a single varnable or with a onedimenstonal array, but when it came to a four-dimensional array we ran into problems. Other "experts' put theur heads round the door, saying "What're you doing? Drawing four dimensional arrays that's easy. Give me the pen" Quarter of an hour later they would look at their handiwork, hand the pen over to somebody else and walk out confused and bafiled.

We reasoned that if you can't imagine a four-dimensional array, let alone draw one, how does a computer set one up and access in? What's more, how does it handle a five- or sixdimensional array?
Ths is how we've come to understand it. If we start off with a single vartable A , and we type $A=10$ the computer will sel up a box called $\mathbf{A}$ and inside this box it will store the number 10.

If instead we type DIM A(3) the computer sets up threc locations (boxes; Fig. 1 called $\mathrm{A}(1), \mathrm{A}(2)$ and $\mathrm{A}(3)$ (assuming the computer starts numbering artays from I and not 0). We can access these localons by typing $\mathbf{A}(1)=10$ or by puttung a variable instide the brackets, e.g. $A(I)=10$.

# Can you imagine 4D arrays? We show you how 

> Four-dimensional arrays are hard to visualise. Graham Kendall explains the logic behind the fourth, fifth and even sixth dimension. Even novices should catch on

If we dimensioned an array with DiM A(3,3) the computer sets up ntac locationt (F1g.2). In order to access any of these locations you must specify the row followed by the column. Thus, if you type $A(2,3)$ it whil access the second row and the thurd colums (see asterix).

With three-dimensional arrays, if we type D1M $\mathbf{A}(3,3,3)$ this will set up 27 locatrons ( $3 \times 3$ x3). Imagine a box or a Rubic's cube with תine faces on each side; that's what we've just set up (Fig.3). To socess this box
we must speafy not only row and columit but also depth. So of we type $A(1,3,3)$ we tre accessing the lirst row, thurd column and thurd depth (sec asterik)

A three dimensional array is a way of accessing somethang in three different ways: firstly, left and right: secondly, up and down and thrdly, backwards and forwards. Left and nght gives us the rows, up and down the columns and back wards and forwards the depih. This can be drawn (F18.3).

But if you want to add another dimension to your drawing you can't - any line you draw will always be in one of the other dimensions. We are faced with the problem of imaginung a four-dimensional array and subsequently, realsing how the computer stores and accesses it.

Look at it this way, DIM A(3,3,3,2) sets up a fourdmensional array. In reality it sets up two three-dimensional arrays (F1g 4). The last parameer dictates how many ihres-dimensional arrays are to be set up, thus DIM A $(3,3,3,2)$ sets up two three-dimensional arrays givung 54 possithle locations ( $3 \times 3 \times 3 \times 2$ ) whte DIM A $(3,3,3,7)$ stels up seven thresdimensional arrays giving 189 possible locatuons ( $3 \times 3 \times 3 \times 7$ ).

In a four-dımensional array the first three parameters relate 10 row, column and depth, whle the fourth parameter relates to which threedimensional array you wish to access. So $A(3,3,3,1)$ would access the asterix in Fig. 4 whereas $A(3,3,3,2)$ would access the percentage sign. A five-dimensional array DIM $\mathrm{A}(3,3,3,3,3)$ sets up 243 locations ( $3 \times 3 \times 3 \times 3 \times 3$ ). Think of this as nine three-dimensional arrays (Fig.5). The computer accesses this by row, column, depth, sub-set and array wathin sub-set.

Thus if you type $\mathbf{A}(\mathbf{3}, \mathbf{3}, \mathbf{3}, 2,1)$ it accesses row 3, column 3 . depth 3. sub-set 2, and array 1 withn thal sub-set. In thss way A $(3,3,3,2,1)$ would access the

Fig. 1 One-dimensional array

| 1,1 | 1,2 | 1,3 |
| :---: | :---: | :---: |
| 2,1 | 2,2 | 2,3 |
| 3,1 | 3,2 | 3,3 |

Fig. 3 Three-dimensional array
Fig. 2 Two-dimensional array
akrenx in Fig. S, and $A(3,3,3,3$, 2) would access the percentage sign.
Now DIM A $(3,3,3,3,3)$ gives us nine three-dimensional arrays, which means 243 prossible locatoons ( $3 \times 3 \times 3 \times 3 \times 3$ ), but if we DIM A $(3,3,3,9)$ this also gives us bure threedinnensional arrays and thus 243 tocations. If thes is the case why do we need more than fourdamensional artays?
We'll leave you to puzzle that one out for yourselves. By the way, if you find out, could you let us know please?

Fig. 4 Four-dimensional array

3,3,1,2,1

This is a difficult and mariguing game for the unexpanded T1 You must collect exght gems that are focated along the screen. Only when all have been recovered can you enter the transporter that takes you on to a different layout
The probterm is how to reach the gems. There seems to be only one route possible.
Bricks are safe entough to walk on, but footrests have the alarming habil of syarting to drsappear whule you are stendtrg on thent. Lottering too long on these may mean you are tinable to use them on a planned return wast
If all this weren't overwhelming enough, another factor is
involved - your oxygen supply A meter at the top of the screen indicate oxygen constimption Should this sun out before you reach the transporter, or you fall too far, then it's back to the beginnung yet again

There are two versions of the game on lape. One uses the keyboard to montrol movement, the othet tequares a joystick each works adequately. J.W

According to the Sinclar hand－ book，despire the complex layout of the display File， interacuve games are easy，as you tan detect a character at any screen postion whath the function SCREENS．However， what the handhook doesn＇t tell you is that thes function wull only detect characters in the Spectrum＇s existing character set．SCREENS does not work with user－defined characters． which，if you want yout gatie to look good on the screen，are just the characters you will want to detect．

Forlunalely，there is a relany－ ely easy solution to this problem －redefine some of the existing characters to the characters you want．How？Read on and l＇t explans．

The Spectrum＇s character set （the data which delines which dots are INK and which are PAPER）exists in ROM，You can＇t change them in ROM，but what you can to if you want to alter some is to transfer this data to a safe place in RAM， where they can be altered，and change a sysiem variable which is called CHARS in the hand－ book．This system variable tells the computer where to start looking for the dot pattern when PRINTing a character on the screen．
The first thang yout must do is ercate a safe place in RAM to store the character set．Thus can te tone by lawerus RAMTOP． but this will be differem for $16 k$ and 48 K machires．The follow－ ing insiructons are for the 48 K Spectrom；if a different value is required for the 16 K Spectitu， this is shown in square brackets． Lower RAMTOP with the direct command

## CI．EAR 64549［31831］．

This will leave enough space for the normal and UDG character tets．Now copy the character set from ROM to the safe area whti：

101 E゙「 $8=64500$［31832］
20 FOR $1=15616$ TO 16383
30 POKE $x$ ，PEFK
40 LET $x=\pi+1$ ：NEXT $\mathbf{i}$
Finaliy alter the value of

## Interactive games on The spectrum

## want to know how to redefine existing characters？ Thex regular David Nowotnik shows you how

You can use the following thort routse to redefine any tharacter of ASCII code between 32 and 127 wilh the following routinc；you enter your column of numbers one a！ a lime，from the lop down：

1．0 INPUT＂Enter character code＂；$x$
20 L．ET $x=x+6.4334\{31576\}$

30 FOR $i=0$ TO 7
40 INPLT $y$
50 PRINT i．y
60 PORE $x+1 . y$
70 NEXT
You could，ir you so demred， allet all 96 of the existing charatier set，then return the computer to the onginal sel with the commands．

POKE 23606，0
POKE 23607，60
CHARS wht the commands：
POKE 23606，88
POKE 23（0）7．251［123］
All should appear quie normal． except that your Spectrum is now accessing the copsed character set every time something is princed on the screen．You can now redefine any character you want
The eastest way to the this is to use a spectal program designed for that purpose or design your churacters． marnally．
Take a sheet of paper and draw gn $8 \times 8$ grid．Deede wheh squares will be＂on＂and which will be＂off＂in your new character．Mark these＂on＂＂ wath cross．When you have finshed，work slong egeth row of the character，and assign the following value to a hox if it is ＂O日V：

Add up the soal for each row and write that value dongside the row，In the above example， dots with the value $64,16,2$ ， and I are＂on＂，therefore the row toral is $(64 \div 16+2+1)$ $=83$ ．When you have finushed， you should have engit numbers all within the range 0 to 255 ．

## Words and wings

## Mingo THV Ime E12.n5

Complete Microcompuier Services, 32-38 Osnaburgh Street, London NWI 3ND
I have ofien had the feciang thal there should be mote compuler games for several players. This progran is designed for one to fout playeri, although the fascinauon of playing on your own is hard to sec
You are deatt, in a very long. winded manner, 12 words from the computers' list, and you have to try to make these into a gramaticaly correct and meaningul English senience
You have $n$ whole series of jomning words and word endings tavalable and you beore by the complexily of the sentence you buid
Needless to say the computer can"t understand your sertences, so yout fellow players have to spprove your work before scorimg

The sentences have to make sense bui can be surreal. extrandinary or just pian silly. In short this is word based game which would be better played using cards
The only thing that the computer does well fs provide a scort. Everything else is made more complex by ustng the machine
It mught be fun the first tume, but I cannot see artyone really spending an evenang round the micro just to play this game.

# tters Letters Letters Letters L ers Letters Letters Letters Let 

## Stop

## checing

Having read Paula Le Page＇s letter in HW 84，J feel that I must repty to some of her comments

Firstry I would itke to say thal I agree whole hearted，$y$ with her view that the HC W lellers page should nol be turned miog cheals page by the people who can＇t complete lite vatious adventure games that are always being mentioned Surely il spoils the fun of a game if someone gives you all the answers and tt staps you geiting as mush value for moncy but of your sofiware When J＇ve spent ES or more on a game l＇d raiher do at myself，thank you．

It also sports the leters page for thote HCW readers who don＇t want to cheat as mome weths thete＇s nothing on the pape ！can read wathoul it spoiling my fun by giving the lae answers 10 one of my ganyes

1 mus1 日dmat that 1 sometimes get led up with the number of tellers ete in HC， 4 for TL Dy 4 A uwners （I own a ipectrum 4kkt but I can set their point I would be very wortied aboul the future of my compting hobby if the Sptetriam were ever to go out of production Howevef I do think there should be more of a halance in HCW，after all Specirum owners are in the majorily so it is quite logical to have more material for this billiant compuler than for any olher and 1 think all reasonable peopie mus！ agree with the

I think HCW is a great magazine and the only thing thal needs changing is the letiers paye I want to see more interesing ielters being published－lake thas
Henry O＇Damovim，Tom duay

## chenolng

 semer1 Whas very pleased 10 see （HC W 84）thal 日s last your letters page has cul aut the dross of how to cheat on various boring games ti＇s much more inkeresting to read other peopte＇s points of view and i hope this will continue．

You must admit，HCW， that your pages have been salker ith $\pi$ over the summer We＇re all looking forward to bumper Chnst mas isues like you released
last year，and lots of reviaws and even more reviews．

I think that the comprite has changed quite dramatic－ ally ouer the last year II you just think back to this time last yeat．evervihong＇s so different Nol only have many sofiware compants smartented up and improved theis marketing in shosi bevorne more professuonal
but all we common or gapden users are also growng un a bit in what we Jike to buy or type in to our compulters．

Of course，we＇re going to miss the sparks of origiza lity and the novelty，bul thonk It can only be for the good in the leng run Amateur companies may be fun while it lasas，bul once the endusiry has progressed as far as It fow has，u＇s imporfant to maistan some kiad of crediblaly

If you want to knaw my forecasi for the near future， ［ thant thal we ucers are going to gel more and more sophisticated and ablitites and businexs pragrams will dommale Of coupse ahere will atways be the sames freaks，and I admul that enfoy playing games，bul I thunk ithas there will be more and thore spabtery who＇s going to admt to spending hours and hourt puaying arsade games when strtoss users will be expanding themp begis with graphits and ulilities？

It will be inieresting to see how 㫙i the somputer magatumes ert goung to react to the shift in the market There are so many compuser magarines that it wilh be vital for them to adapt to cater for the public＇s needs Perhans we＇ll see new magarines springing top whech cated for the young fand the not so young）amateur program． mers and even those who jusi like tinkering w th thetr micros．Can you imatine it －Your Litaly or Lilaty Compuring Weckly．Per－ haps wetlo see those utlos in the near future，who knows？
Chite Glboon，Onfort

## hober

J have in moblean and I was wondeng of any other HCW readers are having the same difficulies
own a Cormodore 64 whech 1 got for my burthday fast year and 1 spend quite a lof of thme using it Now my parents say that 1 am wasling all my lime playing games on it and that they never see me becatese when I
come in from school I go straght to my Commodore and siart using it They say that 1 ant negientiag my school wort and that should be working for my O leveas instexd of mucking around on a useless hobby Do owher readers find that their parents sland an the way of this excelient pasume or am I the only petson wath thus problem？
d ery to expiain to them that I am spending my time userully if am Icaching myself to progrant and am getting quite goond al it Compuling is used in many jobs nowadays so I think that my hobiby will help my career protpects tod

What can I do lo make my parents see that com puters aren＇t a waste of IIme？They say thal they wish they hadn＇t bought it for me
Johi Rapaboltome，Minh chentit

1 am 27 and wall accept mail from any age group． providing they are 64 users and enjoy adventures．

In Robertson，IA Cedar Hse，Spelthorme Grove， Suabery，Middx

We have no connection with Mr Robertson and have not pald hum to write fiotiering letiers about Argus！Adventure buffs whit be plfaced to fedrat that we wifl shartily be feafuring ath advenlure columan， 30 write in with vour problems or odvice．

1 am wroung to wars HCW readers of new program from lis Goid After beng advestisted as enrly as Augusl，Nito Commander was finally avaslable in October As ihere is a thortage of war stmulation programs for the（ommb－ dore 64 I purchased immedjalely

The instructos bobk mentions a demonsiration mode，this did not exisi on my copy However，wof 1 of all find that there is no facility to play agas on complemon of a parne It must be reloaded from the start which lakes aboul tive minules，a atuation which is obviousiy unacteprable

This lack of altention 4 detal is not what 1 have come to expect from US Gold who in thy expenence has produced excellen software in the pasi 1．Gor one，am shting my copy of Mato Commander back and demanding erefund I shall cerlathy be more careful when buvar from them in the futbre and my advice to HK 4 readers
your money＇${ }^{19}$
Paul Aasth，Chendle Hulae

You should be ashamed HCW，I＇m referring to Bernadette Barron＇s leter （HCW 84）．

The altitude that ul＇s OK 10 copy sofiware and records is rife then you buy a program，record or TV lucence you pay for the right to ure that informalson．If you want to transfer that program， music or programme on to another mednmm it is wathin your iegral nght，so all tetose people who copy programs to disc，and records 10 1ape and video－fecord Blankely Bank aren＇1 breaking the
law if they dio it for their own use．
tf they then give（or sell） the rape to someone else they are cheating the company who produced the goods out of the money which is their due in the case of video recordings thes dows not usually matter because most people who have a video recorder will have a TV licence and will have pald for the right to see the programme anyway However both music and sofiware cosi a lot of money to produce An average progratn may lake three moalits to a year 10 develop the programmer has to be perd duriag thal lime，so that be can efford to ent，siecep and scratch his head at regular initervals．If you parale ins game he does nol ge the money you owe幺וル

A programmer gets about 15 per cent of the seiling proce of his geme－there are huge costs involved in manolacturing，packaging． distributitg and advertising sultware To recover costs 16 is necessary for the software house to sell more than 20,000 copues of ench program If one Itile fall： anotuer has io subsidise this Luss

The days of rich sofiwhre houses and programniers driving Porsches art ovet and if you insst on stealing Ither work they won＇t be able to afford to produce the goods and you will suffer If people spend money productang a market－ the item they are owed something for your use of it The argument that soflware 15 too experstive does not whah，there are many things I wouid like but can＇f afford but that does nol give me the right to sleal a mandramel
Jerry liowler，Croydan
